

## Etapas de Processamento do Sinal

```
graph LR; A[Microfone] --> B[Amplificação]; B --> C[Circuito de Ponderação]; C --> D[Saída];
```

The diagram illustrates a four-stage signal processing flowchart. It begins with a 'Microfone' block, followed by an 'Amplificação' block, then a 'Circuito de Ponderação' block, and finally a 'Saída' block. The first three blocks are grouped within a dashed rectangular box labeled 'Etapas de Processamento do Sinal' at the top. Each block is a rectangle with a solid black border, and they are connected by horizontal lines indicating the flow of the signal.
